unit component

HTML
CSS 配置される場所は知らない (ボタンのマージン指定とかやらない
Event Trigger DOMの change イベントをキャッチしてonBudgetChanged() を発火
Event Listner
UI State 開始日の未入力時に 終了日は disabled になる
Validation Logic 終了日は開始日以降でなければ いけない
Model
Dependen cies

```
account-picker
                                  account-list
                                                                      budgeted-account-selector
OneWayBinding
                                                                       OneWayBinding
